

Research Assistant Position

The University of Warsaw, Faculty of Economic Sciences is seeking candidates for a research assistant to dr. hab. Marek Giergiczny (<https://scholar.google.com/citations?user=zratqEMAAAAJ&hl=pl&oi=ao>) to work on the project in NCN project OPUS22 “Development of a methodology for estimating cultural ecosystem services”.

Short description of the project and its main goals

Ecosystems generate a range of goods and services important for human well-being, collectively called ecosystem services. Yet, it has turned out difficult to move from general statements about the very large benefits nature provides to people to credible, quantitative estimates of ecosystem service values. Spatially explicit values of services across landscapes that might inform land-use decisions are still very rare, the main goal of this project is to fill in this gap. This will be achieved by:

- developing a new approach to collect nature-based recreational data which will enable to understand and quantify how people make nature based recreational choices,
- developing a revealed preference modelling framework to model sites selection for recreation,
- developing a combined stated and revealed preference modelling framework which will enable to link recreational benefits with characteristics of different ecosystems.

The offer: scholarship of 4,000 PLN per month (flexible working hours) for 36 months (possibility to prolong the term), subject to an evaluation procedure after 6 months of employment.

This scholarship can be combined with the base scholarship for PhD students at the University of Warsaw (Social Sciences PhD school, Quantitative Psychology and Economics PhD program) and other funding (conditional on involvement in advisor's research projects).

Main strengths of successful candidates (at least one should apply):

- Interest in interdisciplinary scientific research, or/and
- Good command of English, academic writing in particular, or/and
- Computer programming or data science skills

Successful candidates might also have (preferable, but not a requirement):

- Experience in academic research, writing/editing texts in English, econometric modelling, knowledge of GIS tools
- Knowledge of R environment or other statistical software
- Ability to work independently and self-motivate
- Interest in interdisciplinary research combining economics and environmental sciences
- Recommendations from academics or professionals
- Economics or other social sciences, environmental or mathematics-related background

Main tasks involve literature reviews, programming, data analysis, drafting and editing academic publications, and designing new research studies.

To apply, please send the following materials to m.giergiczny@uw.edu.pl: (1) cover letter describing your interest in the project and highlighting the related qualifications; (2) resume indicating academic background, relevant coursework (preferably with transcripts / scores), language skills, and research and work experience; and (3) signed clause of personal data processing agreement. The deadline for applications is 30th of June 2023. Position is conditional on acceptance to one of the Warsaw University PhD programs; feel free to consult with dr. hab. Giergiczny regarding the application and a PhD research proposal.
