

### NCN call for proposals type: OPUS 25 HS4

Faculty of Economic Sciences at the University of Warsaw is looking for a student/PhD student, to work in National Science Centre OPUS 25 grant "**Economic and social consequences of violating constitutions – mechanisms and microfoundations**" (UMO-2023/49/B/HS4/04300, principal investigator prof. Katarzyna Metelska-Szaniawska, 1 post).

#### Requirements:

- Ph. D. student in Economics or BA/MA student in Economics;
- interest in the application of economic theories and tools to the study of the law and/or politics, in particular with regard to constitutional issues;
- excellent English language skills (in speaking and writing);
- experience with statistical software Stata and/or R, at least at an intermediate level;
- individual and group work skills;
- availability.

Skills that will be an asset:

- University education in Law or Political Science,
- competence in the field of Law and Economics, Institutional Economics and/or Political Economy, confirmed by education and/or research experience in these areas,
- experience in writing academic papers in English,
- experience with Qualtrics software

#### Description of tasks:

Constitutional economics studies have systematically confirmed the significance of constitutional frameworks for policy decisions and economic outcomes. De jure-de facto gaps, that emerge when constitutions are not complied with, undermine the effectiveness of these mechanisms and increase the transaction costs of governing. These consequences can be expected to translate into adverse economic and social effects. A recent first empirical study on this topic for the global sample (Lewczuk, Metelska-Szaniawska 2023) delivered a tentative indication of a negative effect of constitutional non-compliance on Gross Domestic Product per capita. With this project we aim not only to confirm this result using more reliable empirical methods, but also broaden this research agenda by asking a battery of additional questions, as well as provide new insights on the mechanisms behind these effects and their microfoundations.

In our research project, we collect data and use econometric methods to study the effects of non-compliance with constitutions around the world at the country level, as well as employ survey and laboratory experiments to study the behavior of two types of economic actors – individual investors and individual consumers/citizens in order to focus on the microfoundations of these effects.

The student co-investigator will be involved in all phases of the project to increase his/her learning opportunities. In particular, the researcher will be involved in:

- collecting and analyzing the background literature;
- collecting and processing the empirical data, including the preparation and execution of the survey and laboratory experiments;
- analyzing the empirical data using statistical and econometric tools;
- serving as general support to the PI.
