Zagadnienia odpowiadają programom studiów I stopnia z r.ak. 2022/23 oraz programom studiów II stopnia z r.ak. 2023/24 bo te roczniki bronią się wg planu w r.ak. 2024/25 lub później.
Please note that the topics correspond to AY 2022/23 1st cycle study programmes and AY 2023/24 2nd cycle study programmes since according to the study plan these students will be defending their theses in AY 2024/25 or later.

| Cycle     | Lang. | / Course                          | Number of topics |           |  |
|           |       | Advanced Microeconomics I         | 5                | х         | Games in strategic forms and extensive Games   |
|           |       | Advanced Microeconomics I         | 5                | Х         | Nash equilibrium in pure- and mixed strategies   |
| II        |       | Advanced Microeconomics I         | 5                | х         | Subgame perfect equilibrium  |
| II        |       | Advanced Microeconomics I         | 5                | х         | Bayesian games and equilibrium in Bayesian games   |
| Ш         |       | Advanced Microeconomics I         | 5                | х         | Repeated games and folk theorem  |
| Ш         |       | Advanced Microeconomics II        | 5                | х         | Describe the concept of Pareto efficiency.   |
| П         | ENG   | Advanced Microeconomics II        | 5                | х         | Describe the problem of consumer optimization.   |
| Ш         | ENG   | Advanced Microeconomics II        | 5                | x         | Describe the problem of producer optimization.   |
| Ш         | ENG   | Advanced Microeconomics II        | 5                | x         | Measurement of changes in economic welfare resulting from simultaneous price and income changes.   |
| II        | ENG   | Advanced Microeconomics II        | 5                | x         | Standard equilibrium conditions in a Walrasian equilibrium and its welfare implications.   |
| H         | ENG   | Advanced Macroeconomics           | 7                | х         | intertemporal choice of the consumer. Impact of current income, income expectations, interest rates, borrowing constraints on the current consumption.                     |
| П         | ENG   | Advanced Macroeconomics           | 7                | x         | Impact of uncertainty and income risk on the stock of consumer assets and their composition.   |
| II        | ENG   | Advanced Macroeconomics           | 7                | x         | Solow model. Determinants of growth rate of aggregate and per-person GDP in the medium and long term.  |
| Ш         | ENG   | Advanced Macroeconomics           | 7                | x         | Ramsey and overlapping generations models. Determinants of the investment and saving rate in the economy. Impact of taxation and public funds use on long-run equilibrium. |
| II        | ENG   | Advanced Macroeconomics           | 7                | x         | Endogenous growth. Incentives for research and development activities and their effects on long-run economic growth.   |
| II        | ENG   | Advanced Macroeconomics           | 7                | x         | Real business cycles model. Effects of real (e.g. technology) shocks on the short-run equilibrium.   |
| Ш         | ENG   | Advanced Macroeconomics           | 7                | x         | Equilibrium unemployment in the job search and matching over the business cycle.   |
| II        | ENG   | Mathematical Methods in Economics | 5                | x         | Applications of Linear and Non-Linear Programming in Economic Optimization   |
| Ш         | ENG   | Mathematical Methods in Economics | 5                | x         | Mathematical Foundations of Economic Models: Linear Algebra and Systems of Equations   |
| Ш         | ENG   | Mathematical Methods in Economics | 5                | x         | Dynamic Systems in Economics: Differential and Difference Equations  |
| Ш         | ENG   | Mathematical Methods in Economics | 5                | x         | Optimal Control and Dynamic Programming in Intertemporal Economic Decision-Making  |
| Ш         | ENG   | Mathematical Methods in Economics | 5                | x         | Stochastic Processes and Uncertainty in Economic Modeling  |
| П         | ENG   | Microeconometrics                 | 6                | х         | Partial effects, elasticities and semielasticities.  |
| П         | ENG   | Microeconometrics                 | 6                | х         | Endogeneity problem and instrumental variable (IV) estimator.  |
| П         | ENG   | Microeconometrics                 | 6                | x         | Linear unobserved effects model and random effects (RE) and fixed effects estimators (FE).   |
| П         | ENG   | Microeconometrics                 | 6                | x         | Count data models.   |
| П         | ENG   | Microeconometrics                 | 6                | x         | Discrete dependent variable models.  |
| П         | ENG   | Microeconometrics                 | 6                | х         | Nonrandom sample selection (truncated and censored samples) models.  |
| П         |       | Macroeconometrics                 | 5                | х         | Endogeneity, simultaneity, identification and simulataneus equation models   |
| Ш         |       | Macroeconometrics                 | 5                | х         | Integration and cointegration, ECM   |
| П         |       | Macroeconometrics                 | 5                | х         | VAR model, reduced and structural forms, VECM, Granger causality, forecasting.   |
| П         |       | Macroeconometrics                 | 5                | х         | Impulse response analysis (unit and orthogonal shocks).  |
| Ш         |       | Macroeconometrics                 | 5                | х         | Lucas and Sims critique of classical SEM models.   |
| II        |       | International Trade Theory        | 5                | x         | The concept of the comparative advantage in the general equilibrium model.   |
| Ш         |       | International Trade Theory        | 5                | x         | The role of oligopolistic competition in explaining contemporary international trade   |
| 11        |       | International Trade Theory        | 5                | X         | Firm heterogeneity in the theory of international trade and the proximity-concentration trade-off.   |
| II.       |       | International Trade Theory        | 5                | X         | International fragmentation of production.   |
| 11        |       | International Trade Theory        | 5                | X         | International trade and economic growth with knowledge diffusion   |
| 11        |       | Monetary Economics                | 5                | x         | Goals of the central bank and the choice of intruments of monetary policy.   |
| 11        |       | Monetary Economics                | 5                | X         | Monetary policy transmission: Interest rate channel, asset prices and exchange rate.   |
|           |       | Monetary Economics                | 5                | У         | Credit market imperfections and credit rationing.  |
|           |       | Monetary Economics                | 5                | X         | Central bank independence and inflation bias.  |
