

Prof. Michał Krawczyk, University of Warsaw, is seeking a PhD candidate within his project “Experiments on gender stereotypes at the university”. It is a fully-funded four-year position. The monthly stipend is PLN 5000 during the first two years and then PLN 6000 (gross). The project also includes a 6-month funded stay at a university abroad (the Economic Research Laboratory at the Texas A&M University is an option agreed upon, but alternatives could be considered).

**Key requirements:**

Solid background in economics, psychology, or sociology

Excellent command of written and spoken English

Excellent communication skills, experience in writing academic texts

Strong analytical skills

**Desirable characteristics:**

Experience in designing/conducting economic experiments

Working knowledge of gender economics literature & literature on discrimination in labor markets

Knowledge of statistical software (preferably Stata or R)

A publication record is not required but will be an asset. The same is true for good command of the Polish language (or willingness to learn ASAP).

The candidate is expected to join one of the Doctoral Schools of the University of Warsaw, for example the Quantitative Psychology and Economics programme, <https://www.wne.uw.edu.pl/en/candidates/doctoral-program-quantitative-psychology-and-economics/>.

If you are interested, send your CV (including information about GPA), some academic text you have written, (e.g. a master thesis), preferably in English, and a half-a-page motivation letter to [mkrawczyk@wne.uw.edu.pl](mailto:mkrawczyk@wne.uw.edu.pl).

On top of that, you need to register in the IRK system, which may take a while.

Deadline for both: June 28.

Selected candidates will be invited for virtual interviews to take place on July 21-25.
