- experimental and behavioural economics;
- environmental and natural resource economics;
- choice modelling and consumer economics;
- data science;
- individuals' economic activity and family life;
- quantitative finance;

The Faculty specializes also in research on microeconomics, macroeconomics and theory of foreign trade, management and information technology, political economy, finance and accounting, innovation and development, economic history, statistics and econometrics, population economics and demography, technological transformation, education and labour economics.

About the Fellowship

For information on eligibility, mobility and financing please check the website of the MSCA <https://ec.europa.eu/research/mariecurieactions>

About the Faculty of Economic Sciences

Faculty of Economic Sciences of the University of Warsaw is a public institution and aspires to be a leading institution of higher education in economics in Poland. It promotes research into essential problems of the Polish economy, disseminates its outcomes, and participates in the public debate in conformity with high norms of competence and objectivity. It recognises integrating economics into other disciplines as a priority.

As the Faculty of Economic Sciences educates elite of economists for both governmental and private sectors, we assure following the mission of promoting and forming the civic attitudes and virtues of honesty, reliability, responsibility, and respect for principles.

Its small scale, as compared to economic universities, stimulates to prefer advanced study cycles such as second-cycle and doctoral degree programmes; or post-graduate certificates.

High quality of instruction and high demands on academic performance guarantee high academic value of degrees awarded by the Faculty of Economic Sciences.

About the University

With more than 200 years of history, the University of Warsaw is the second oldest university in Poland and at the same time the largest one.

Scientists from the University of Warsaw carry out research on more than 3 000 topics from the range of humanities, social and natural sciences, as well as medicine and technical sciences. More than 1 500 projects are realised with grants won in Polish or international competitions. Teams from the UW work with institutions from all around the world; they have already earned their renown position in many disciplines

About the city

Warsaw is a vibrant, one of the most dynamically-developing cities in Europe. It is steadily climbing the international rankings of the world's most attractive urban areas. Not only is Warsaw a political, economic, social and cultural centre, it is also an undisputed leader in Polish higher education and science. It has been the capital of Poland since 1596. Nowadays it counts 1.7 million inhabitants.

How to apply?
